SUMMARY

Backend-focused Full-Stack CS student at JIS College of Engineering, skilled in building scalable REST APIs and end-to-end applications using Node.js, Express.js, MongoDB, and React. Built 3 live AI-integrated projects and a Top 5 Finalist at GFG Kolkata Hackfest 2026. Seeking backend/full-stack internship opportunities.

PROJECTS

- Hooptl** | *React · Node.js · Express.js · MongoDB · JWT · Leaflet* [Live](#) [GitHub](#)
- Built a full-stack URL shortener with real-time click analytics, geolocation tracking, and an interactive Leaflet map dashboard. Backend follows DAO/Service/Controller architecture with JWT auth.
- PrepDost** | *React · Node.js · Express.js · MongoDB · JWT · Google Auth · Gemini API* [Live](#) [GitHub](#)
- Built a full-stack mock interview platform integrating Gemini API for dynamic question generation with timed sessions, AI-powered feedback scoring, and performance insights. Secured with JWT and Google OAuth.
- CodeReviewer** | *React · Node.js · Express.js · MongoDB · JWT · Gemini API* [Live](#) [GitHub](#)
- Developed a full-stack AI code review tool with RESTful Express.js backend routing submissions to Gemini API. Supports all major languages with line-by-line suggestions covering bugs, security vulnerabilities, and style issues.
